DETAILED ACTION

The following action is in response to the amendment filed for application 10/766,155 on January 24, 2006.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Wiggins on March 1, 2006.

The application has been amended as follows:

claims 5-7, and 11-15 have been canceled.

Election/Restrictions

Claim 8 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 9, directed to the species of Control B is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

Drawings

The drawings were received on January 24, 2006. These drawings are approved.

Allowable Subject Matter

Claims 1-4, 8-10, and 16-18 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the control system for a displacement on demand engine as claimed, and particularly including a pedal position sensor that generates a pedal position signal based on a position of an accelerator pedal, wherein the pedal position sensor and a flywheel starter generator initiate a cylinder deactivation, wherein the generator adjusts torque output to the crankshaft to reduce engine speed variation during cylinder deactivation based on said pedal position signal, and including the remaining structure and controls of claims 1, 8 and 16, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bauerle and Kubodera have been cited to show similar engine controls.
